1. Topsoil will be stripped and stockpiled for use in reclamation. Reject material from mining will also be stockpiled for use in reclamation.
2. There shall be no interference with natural drainage through the area and excavated material may not be placed where it might be washed downstream.
3. Adequate warning signs should be posted at all approaches to the mine site during mining operations.
4. If any prehistoric or historic cultural remains are discovered, the Kanab BLM authorized officer will be notified immediately and all mining operations shall be halted pending investigation and mitigation.
5. If any vertebrate fossils or other fossils of significant scientific interest are discovered, the Kanab BLM authorized officer will be notified immediately and all mining operations shall be halted pending investigation and mitigation.
6. The operator shall promptly remove and properly dispose of all waste caused by mining activities. The term "waste" as used herein means all discarded matter including, but not limited to, trash, garbage, refuse, petroleum products, ashes and equipment.
7. All land survey markers must be protected against destruction or damage. The operator must re-establish any damaged or destroyed markers in accordance with accepted survey practices.
8. Except at the quarry face, the sides of the excavation area should not exceed a 3:1 slope.
9. The Kanab BLM authorized officer shall be contacted three days prior to commencing reclamation work.
10. Reclamation will include reshaping the site to approximate original contours, and the site shall be terraced to control erosion and prevent landslides.
11. A suitable vegetation harmonious with the area shall be established. The disturbed areas will be seeded with a seed mixture approved by the Kanab BLM authorized officer.
